

# **INSTITUTO POLITECNICO NACIONAL**

## Nanosciences and Nanotechnologies at IPN

**J. G. Cabañas Moreno**

**Center for Nanoscience and Micro-Nanotechnology**

## Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

### **BACKGROUND**

**Global Importance of NN  
to develop at the atomic and molecular level  
new knowledge, tools, techniques  
for application in the solution of 21<sup>st</sup> century priorities**

#### **Instituto Politécnico Nacional (IPN)**

- one of three national institutions
- approx. 175,000 students (high school → graduate school)
- approx. 20,000 employees (10,000 full-time faculty members)
- approx. 40 schools and research centres distributed all over Mexico

## Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

### **STRATEGIES**

---

#### **[1] Formation of institutional NMN network**

- **Need to tackle complex, multidisciplinary problems**
- **Need intramural collaboration and synergism**  
→ **Break artificial barriers among Schools & Dept's**

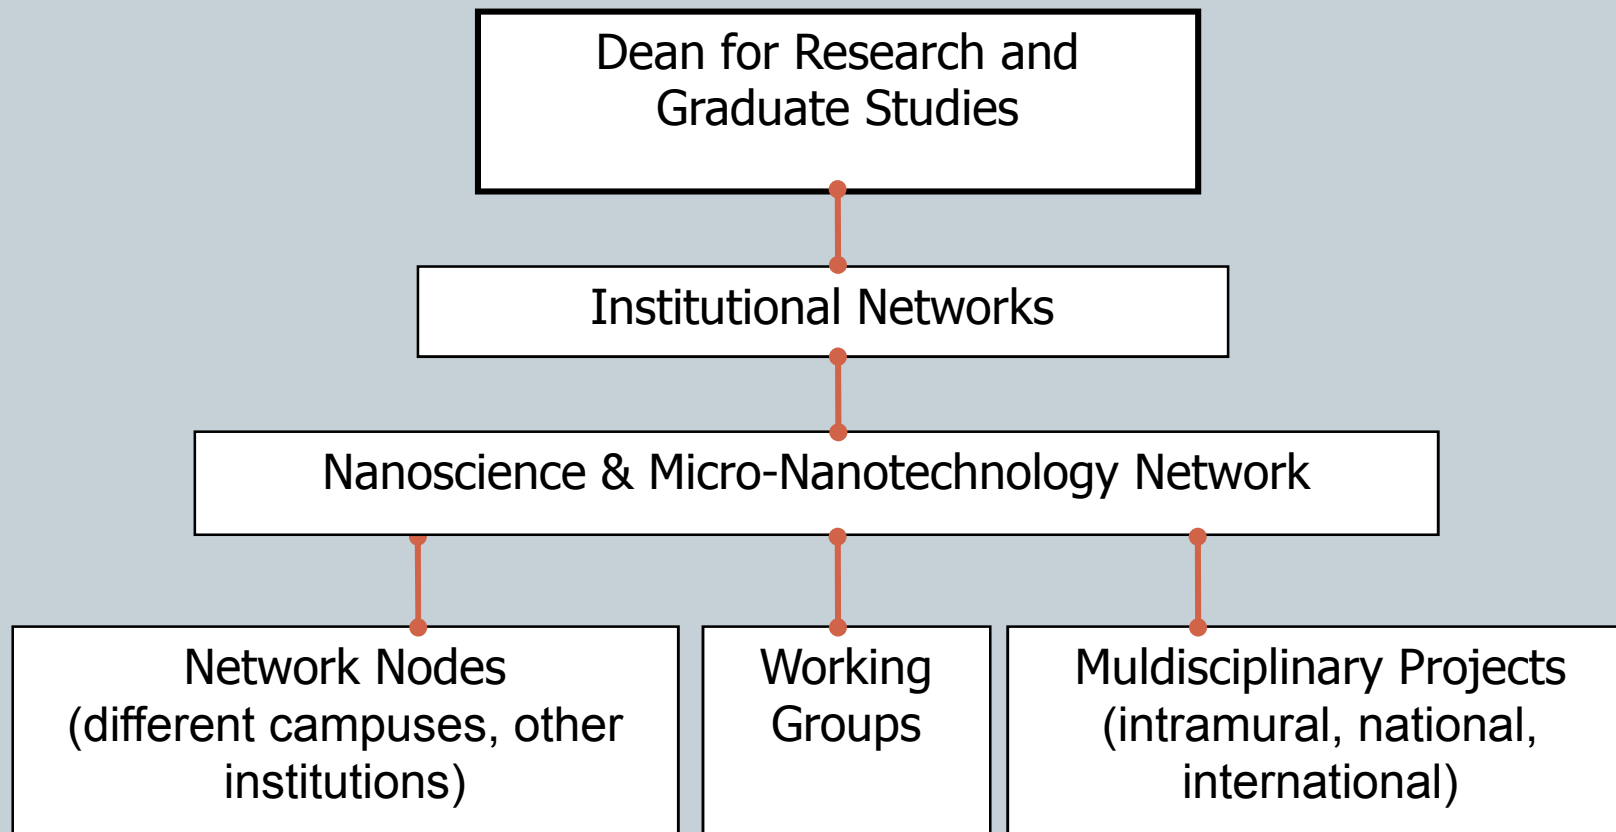

#### **[2] Creation of Center for Nanoscience and Micro-Nanotechnology**

- **Provide state-of-the-art equipment and facilities**
- **Support NMN network activities (and viceversa)**
- **Support IPN participation in national & international NANO initiatives**

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## NMN Network– Organization

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## RESEARCH AGENDA

- **Energy**  
(photovoltaics, solar, hydrogen technology, electricity generation and distribution,...)
- **Environment**  
(soil and mineral tailings remediation, characterization and degradation of contaminants, ...)
- **Health**  
(drug delivery, techniques for body exploration, cancer treatment, ...)
- **Materials**  
(catalysts, membranes, bulk nanostructured materials, molecular simulation, semiconductors, nanoparticles, nanofabrication, ...)
- **Microelectronics and devices**  
(IC, MEMS, sensors, biomedical devices, ...)

+ **EDUCATION** - (high school to graduate school)

## •Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

### Center for Nanoscience and Micro-Nanotechnology

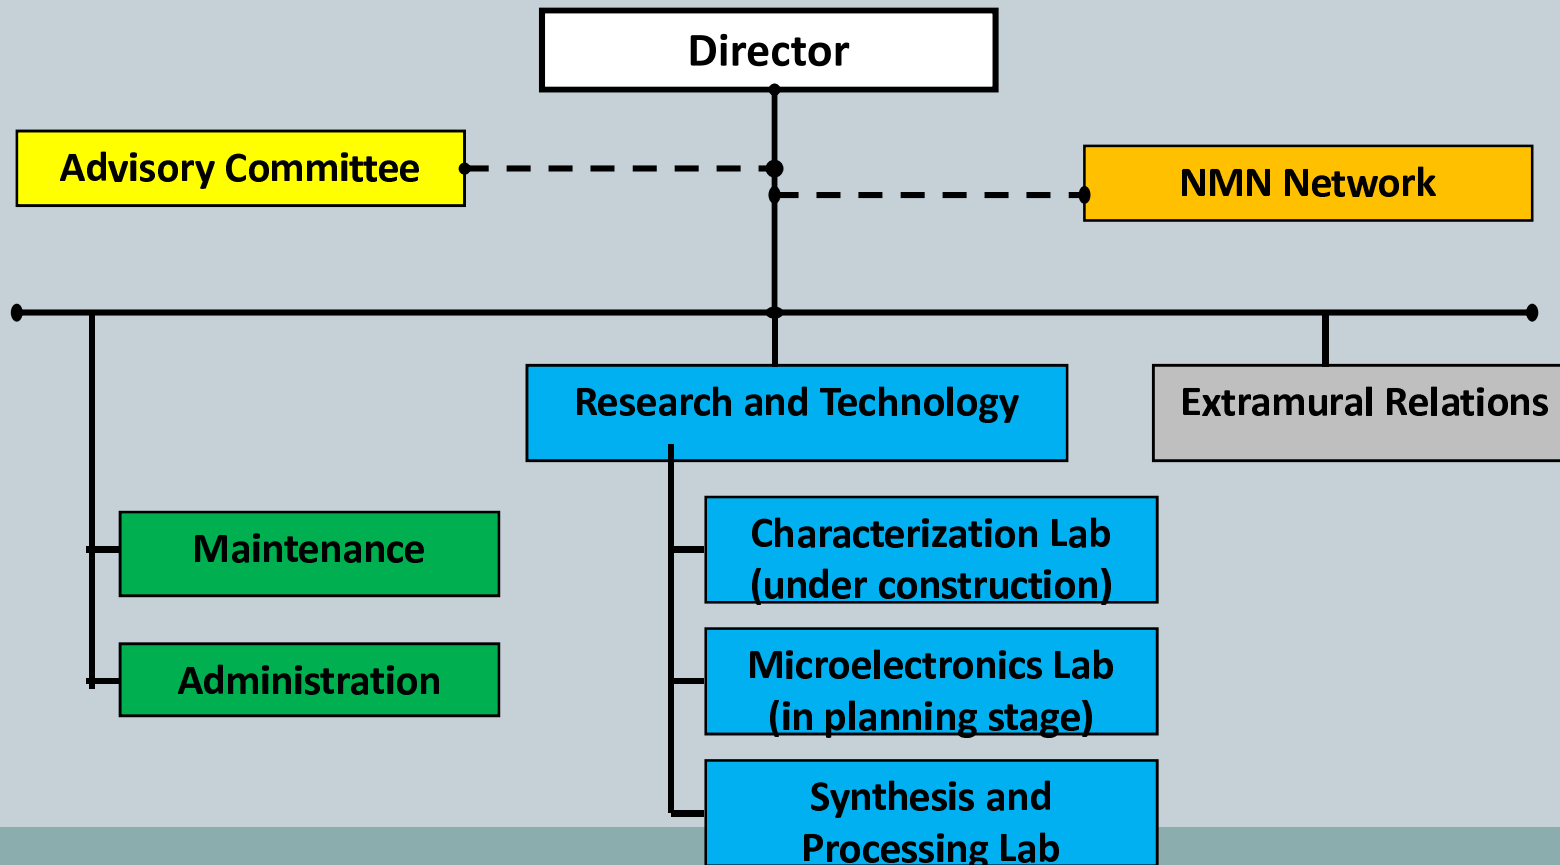

**Mission: Support activities & initiatives in IPN related to NMN**

- **state-of-the-art facilities and equipment**
- **provide access (expertise) to modern facilities (techniques) for researches and students**
- **optimize utilization & timely update of expensive equipment**
- **support Associate laboratories located at Schools & Research Centers within IPN**
- **support communication with governmental, social and industrial organizations interested in NMN**

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## Center for Nanoscience and Micro-Nanotechnology - Organization -

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## Center for NMN Laboratory Facilities (original plan)

~ 8 – 10 M USD  
2008-2010

Characterization Lab

2008-2011

Microelectronics & MEMS Lab

2011-2012

Synthesis & Processing Lab

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## Characterization Laboratory - Facilities -

X-Ray Diffraction

Spectroscopies

Microscopies

Physical and Chemical  
Properties

Lab building (400 m<sup>2</sup>) to be deliver in April 2009  
Equipment being purchased at this time

## Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

### **Microelectronics & MEMS Laboratory - in the planning stage -**

Desired Capabilities (IC, MEMS)

- Design
- Characterization
- Fabrication (limited)

Expecting to have a blueprint in 2-3 months

# Nanosciences y Nanotechnologies at Instituto Politécnico Nacional

## Research Activities on NMN at IPN (broad classification)

**NANOPARTICLES AND MICROORGANISMS**

**NANOPARTICLES IN MEDICAL APPLICATIONS**

**NANOSTRUCTURED MATERIALS IN BIOTECHNOLOGY AND FOOD  
APPLICATIONS**

**NANOSTRUCTURED MATERIALS AND ENVIRONMENTAL APPLICATIONS**

**NANOSTRUCTURED MATERIALS AND SENSORS**

**NANOSTRUCTURED MATERIALS AND CATALYSIS/PHOTOCATALYSIS**

**NANOSTRUCTURED MATERIALS AND HYDROGEN PRODUCTION AND  
STORAGE**

**SEMICONDUCTOR THIN FILMS AND ENERGY APPLICATIONS**

**NANOSTRUCTURED MATERIALS FOR STRUCTURAL APPLICATIONS**

**MEMS DESIGN**

Thank you for your attention

# Characterization Laboratory

**X-Ray Diffraction – (alta potencia, alta resolución, texturas)**

**Espectroscopías – resonancia magnética nuclear (NMR) sólidos, microRaman de alta resolución, resonancia electrónica paramagnética, espectroscopía de fotoelectrones (XPS) + espectroscopía Auger, espectroscopía de masas**

**Microscopías – óptica confocal, electrónica de barrido de alta resolución (SEM-FEG), haz de iones enfocado (FIB-SEM-FEG), electrónica de transmisión de resolución atómica (TEM), de fuerza atómica (AFM), de tunelamiento (STM)**

**Propiedades Físico-Químicas – magnéticas (SQUID), análisis de partículas, AFM multifuncional, espectrofotometría**
